Small Fry of the Professional Class Had the Market to Themselves.

PRICE MOVEMENT IS SLOW

APPARENTLY THERE IS NO DE-MAND OR PRESSURE TO SELL.

New York, March 24.—In the absence of positive developments affecting property values in the news, operators in stocks today acted largely on deductions from the negative side. The operations were simost wholly in the hands of the smaller professional class and were significant. Am. Sug. Pofering Am. Cot. Oii ... Am. H. & L. pfd Am. Inc. Sug. Pofering Am. Cot. Oii ... Am. Pofering Am. Inc. Sug. professional class and were significant, therefore, of nothing more than the view of that class. The fact that the violent break in the local traction shares had not resulted in bringing on the market any considerable quantity of other shares was accepted as indicative of the good resisting power of the market. With this proof that prices were not ready to go proof that prices were not ready to go down, the room traders took the alternative and tried to make them go up. There was a further break early in the day in Third Ayenue and some slight weakness in the general list in sympathy. This was so slight as to suggest the shift in the position of the traders.

Foreigners also had a hand in causing the early heaviness, sales for London amounting to several thousand shares. A renewal of uneasiness over the political situation in the Balkans was reported from various financial centers abroad. Aside from the immediate anxieties caused by these periodical crises in the Balkan question, the prospect that a final settlement is likely to be delayed dis-courages the taking of a definite specu-lative position in the markets. It is the bellef in the continued unsettling influence of this, together with various other questions, which is keeping the stock market activity at a low stage.

The anthracite labor question was viewed today in rather a cheerful frame of mind and assertions were current that a way had been found for a settlement, which would appear in the course of the day. Something was made also of rumors of large sales of refined copper yesterday. Efforts to substantiate these rumors met with failure, although some moderate increase in demand for copper in the last few days was claimed. The price of the metal was marked down again in London today. The reported return of a capitalist lately active in the marketing of a number of railroads was of some strengthening effect on a few stocks, as his rumored illness yesterday was supposed to endanger the completion of some of the projects which he is credited with intending.

The check to the gold export movement to London which has resulted from the fall in foreign exchange rates has come earlier and with less firmness on the local money market as one of the checking factors than was expected. The supplies of funds in London seem to have grown so abundant that banking authorities find it difficult to keep money rates up to the point necessary to insure a continuance of the inflow of gold. Gold bars bespoken at the assay office today were supposed to be for Argentina. Discounts were lower today in London, and aside The anthracite labor question was viewed today in rather a cheerful frame

April settlements, easier money is looked for there at an early date. The coming of spring weather is a traditional influence towards higher prices of stocks and this was taken some account of in the professional trading of today. Weather news from the west was less favorable and the close and growing attention now paid to everything bearing on the winter wheat crop condition makes this subject one of importance to stock market observation. The professed hope of a favorable outcome of the anthracite wages negotiation was made a reason for bidding up Reading in the late market and thus offsetting the inclination to take bidding up Reading in the and thus offsetting the inclin profits which was making Bonds were irregular. GRAIN AND PROVISIONS.

Chicago, March 24.-Wheat-Prices advanced from 1 to 2c here today, owing to

active coverings by shorts based on bullish foreign advices. The market closed strong at net gains for the day of & to 1½c. Corn closed firm, oats steady and provisions weak.

The wheat market was strong all day, although there were glight.

although there were slight reactions at times, owing to liberal realizing sales. The strength was due almost entirely to

The strength was due almost entirely to sharp advances at nearly all the leading grain centers of Europe brought out by a reported poor outlook for the French crop, the low grading of Agentine wheat arriving at Liverpool and by disquieting reports regarding the situation in the Balkans. Shorts were lively bidders throughout the entire session and there was also active buying by commission houses for outsiders. The May delivery was in especially good demand and displayed the greatest strength, the price shortly after the opening reaching 118%, only %c below the high point established on the recent advance and 2c above the previous close. Domestic news was bear-

previous close. Domestic news was bear-ish, rains being reported over a large section of the winter wheat belt. De-

section of the winter wheat belt. Demand for cash wheat and flour was also said to be at a standstill and primary receipts more liberal. During the day May ranged between 116% and 118%. The market closed strong, with May at 117% lift, and July at 104%.

Wet weather in the corn belt was largely responsible for a strong market for corn, although the bulge in wheat and a predicted falling off in local receipts also had some bullish influence. Shorts were the principal bidders during the day and offerings came mainly from longs. The market closed firm at net gains for the day of %@%c. May being at 86% and July at 66c.
